Good evening!

Once again the great UK weather deals us a lovely hand, conditions are far from ideal with all the low pressure systems flying across the pond, fingers crossed we may get some settled weather over the next few weeks.

September Course completions.

Congratulations go to the following folk for their respective success.

Kieran Barry, Steve Jones and Jan Hingeberg for their completion of CCR Mod 3 and Advanced Trimix Training.
Roger Smith and Christoph Brieger for Megalodon Module 1.
Peter Hoy, Thomas Tilsted and Jan Hartvig for Intro Cave
Thomas Tilsted and Jan Hartvig for CCR Inspiration Mod 1 Instructor Training
Adrian Norris and Dave Mulberry for Advanced Nitrox and Deco Procedures

And finally the course completion of the year award goes to Max and Nick Smith for their success at CCR Module 2 level, these guys have been working for over 12 months to get their skills and technique spot on and it was great to finally get them through, well done guys. ☺

Winter Diving on Endeavour.

I plan to keep Endeavour running throughout the Winter months until her first group Charters start in March 2007. I will operate a simple pricing system of £35 per person per day for individual divers and the best way to find out availability is to give me a call on 07791 152 317 or email me to check what's going on.

During January Endeavour will be having a refit so will not be operational during this month. She is back at work on Friday 27th January and there are spaces over the weekend of the 28th/29th Jan as I am running a CCR Module 1 course.

I am also running Winter Weekends during December and February for group bookings of 8-12 divers and the cost is £40 per person for 2 dives and B+B at the Bori or Royal Oak pubs.

2007 Dive Trips.

Last months news letter had all the dates for next years trips so if you need updating please click on this link **{** HYPERLINK "http://www.deepbluediving.co.uk/dive_trips.php" **}**

Other News from Deep Blue.

Things are pretty much staying the same for next year, I will still be based in the same centre at Mount Batten but Sean will be responsible for the gas fills and day to day running of the Dive Centre and his own PADI OW training. I will be building the upstairs section of the dive centre as a dedicated Tech Gear show room and will be stocking a lot more Tech equipment including CCR and Scooter spare parts. We are also in negotiation with ISC who make the Megalodons to see if we are able to offer a repair and service facility for Meg owners, at the very least we will be stocking the full range of spare parts required for this CCR, and also KISS, Inspiration and Evolution CCR's.

I have also started to keep New and Used CCR's in stock which means that you can take delivery much sooner than the current 3-6 month waiting list on Inspirations and Megs. At the moment I have UV 18's and 26 scooters in stock from Silent Submersion, 2 second hand

Classic Inspirations, 2 brand new Megs, 1 new Inspiration with Vision and 1 Evolution due for delivery beginning of November.

Our new website **{** HYPERLINK "http://www.deepbluediving.co.uk/" **}** is due to be live at the end of this month. My good friend Leigh Bishop has built the site and has used some of his superb photographs to enhance the information on the site. Towards the end of the year our Tech Gear sales will be on line so you'll be able to see what we have in stock. There will also be a section for second hand equipment that we have available and we will also offer a service for anyone wishing to advertise on our site their used Tech gear, please email me if you have anything interesting to sell.

My Wife Victoria will also be more involved with day to day paperwork and queries. Some of you will already know her and as paperwork has never been my strong point, she will undoubtedly be a great help in this department! She will have a mobile phone number in the next week or two so you will be able to call her direct to discuss any questions you may have. Once she gets the phone I will email everyone to update you with her number.

Finally our L+W compressors are up for sale, one has 2500 hours and the other 3500 and are in good working order, please email or call me if you are interested, they can be seen running as they are still installed at the dive centre.

Short and sweet this month folks, the weather hasn't allowed me to play much this month and as the winter approaches quite a bit of my training now moves abroad.

Please email me if you need any information on any of our courses, dive trips or Tech Gear.

Cheers

rich
